Test	Flag	Result	Reference Range - Units	Lab Lic. #

General Chemistry

A urine ACR measurement is required to stage CKD and further evaluate risk of renal failure. Once results have been confirmed:

If urine ACR >60, 5-year KFRE >=5%, or eGFR declines >5ml/min/1.73m2 over a 6 month period, refer to nephrology.

If eGFR remains between 30 and 59ml/min/1.73m2 and declines <5ml/min/1.73m2 over a 6 month period measure eGFR and urine ACR every 6 months, or annually if eGFR is stable for >=2 years.

See the KidneyWise toolkit (kidneywise.ca) for management recommendations and additional indications that may warrant referral to nephrology in the future.\.sp\
Reference interval: =>60 mL/min/1.73m2

eGFR is calculated using the CKD-EPI 2021 equation which does not use a race-based adjustment.

Albumin	42	35-52	g/L
Bilirubin Total	7	<20	umol/L
Alkaline Phosphatase	88	35-120	U/L
Alanine Aminotransferase	11	<36	U/L
Aspartate Aminotransferase	15	<30	U/L

Referred Tests

TACROLIMUS #0942

Tacrolimus	5.9	ug/L

This test was referred to University Health Network, Laboratory Medicine Program (TGH), 200 Elizabeth St. Toronto, ON M5G 2C4

For technical inquiries, healthcare providers may call the testing lab at 416-340-5227.
